

RHC Tubeless Valves

- Lightweight alloy tubeless valves
- Works both and Road and Mountain bike
- With removable core
- Easy core removing tool Included

Step-by-step direction

Step 1-Install the *RHC Tubeless Tape* as per instruction. [®]

Step 2-Using a sharp pointed tool such as a pencil or pen, punch holes through the tape at the valve stem of each rim, toward the hub.

Step 3-Insert valve stem that comes in *the RHC Tubeless Conversion* System or purchase the RHC Tubeless Valve separately. Be sure to Hand tightens the stem nut to a snug fit. Repeat the steps for the next rim.

Follow the rest of the installation instruction in the *RHC Tubeless Conversion System*.
